Documents cited in the International Search Report:

D1: US 6330044 A
D2: US 5731854 A
D3: JP 08-262219 A

According to the invention, an essential feature of independent Claim 1 is that in order to secure the aperture ratio of a pixel and to block light leakage, distances between the boundaries of the contact hole at the place where alignment treatment or rubbing ends and the boundaries of the first wire or the second wire adjacent thereto and located outside the boundaries of the contact hole are designed to be wider than those between the boundaries of the contact hole at the other places and the boundaries of the first wire or the second wire.

None of the documents above disclose the essential feature defined in the invention.

Furthermore, in the cited documents there are no suggestions leading a person skilled in the art towards the invention defined by independent Claim 1.

Therefore, independent Claim 1 and its dependent Claims 2-10 are considered to be novel, to involve an inventive step and to be industrial applicable.
